

WeYouMe

Social Media with a Positive Purpose

The Problem: Social media companies face rising negative perception issues.

Algorithms

We don't have control over content sorting algorithms.

Monetization

We usually do not earn any income for our contributions.

Data

We don't own or control the use of our data, or earn from it.

Security

Private information is stored in bulk, making it vulnerable to massive breaches

EDITORIALS

Meet The New Censors: Facebook's Zuckerberg, Twitter's Dorsey And YouTube's Wojcicki

Our Innovation: A social media protocol that puts users first.

Content Rewards

Earn from your posts, exchange for your desired currency.

Own your own data

Control how your data is used and monetized.

Configurable sorting

Control how your feed is sorted.

Crowdsourced Moderation

A User driven approach to content management to encourage positivity.

2018: First crowd voted rebranding.

2018: Testnet Alpha Version 0.1 released ahead of schedule, in October 2018.

2019: Testnet Version 0.3: Private posting and merged feeds enabled ahead of schedule.

2020: Mainnet Alpha Release.
